

# TE720

## Technical data\*

### PERFORMANCE

Working height, max. (600 kg)	66,80 m
Working height, max. (320 kg)	71,60 m
Working height, max. (100 kg)	71,60 m
Platform height, max. (600 kg)	64,80 m
Platform height, max. (320 kg)	69,60 m
Platform height, max. (100 kg)	69,60 m
Horizontal outreach, max. (600 kg)	32,00 m
Horizontal outreach, max. (320 kg)	37,00 m
Horizontal outreach, max. (100 kg)	42,00 m
Negative reach, max.	17,00 m
Up and over clearance, max.	46,00 m
Platform capacity, max.	600 kg
Jib, movable	220°
Platform, rotatable	2 x 220°
Turntable rotation, max.	500°
Slope angle, max.	9,0°

### MEASUREMENTS\*

Telescopic platform height	1,28 m
Telescopic platform length, min. / max.	2,40 m / 3,80 m
Telescopic platform width	0,95 m
Length (A)	11,80 m
Height (B)	3,96 m
Width (C)	2,48 m
Centre distance (D) / (E) / (F)	4,55 m / 1,35 m / 1,45 m

### Stabilisation

Länge, max. (G)	12,20 m
Breite, max. (H)	9,00 m
Point load per outrigger plate, max.	260,00 kN

### VEHICLE

Manufacturer	Scania
Type	P 500
Cabin	P Long
Power	500 hp
Emissions class	Euro 6
Axles	8 x 4 * 4
Permissible total weight	32000 kg

### STANDARDS

Harmonised standard DIN EN 280:2016

The technical data may deviate +/- 3% from the specified values.  
 \* Preliminary technical data - subject to change.  
 \*\* Weight and dimensions may vary depending on options and accessories.

# TE720

## Equipment

### VEHICLE

- Can be mounted on various Scania, MAN and Volvo models.
- Structure of boom system allows long cab, e.g. for sleeper cab.
- Rear view camera fitted by vehicle manufacturer.
- Vehicle length of less than 12.00 metres allows approval without special permit.

### STABILISATION

- Infinitely variable stabilisation for dynamically adapted outreach.
- More working area in a 100% circular layout thanks to an innovative stabiliser footprint.
- Electro-hydraulic automatic stabiliser system with infinite number of positions.
- The radio remote control gives operator direct overview of the exact position at any time.
- Excellent visibility in the traffic area thanks to lighting of the stabilizer area and flashing lights on the stabilisers.
- No manual positioning of the stabiliser pads required for setup.

### BOOM SYSTEM

- Telescopic upper & lower booms made of steel profiles with a large up- and overreach of 46 m.
- Powerful hydraulics ensure smooth and safe platform operation, even under load.
- Maximum positioning flexibility thanks to rotating basket (2 x 220°) and 220° movable jib.
- Basket with plate holder and load hooks (payload 300 kg or 400 kg).
- Hydraulically telescoping basket offers sufficient space for operators with tools and materials.
- Wind meter with wind speed indication on the display.
- Space-saving folding seat in the basket.

### CONTROLS

- Easy-to-operate control system for fast and safe operation.
- Intuitive TEUPEN operating concept and a choice of three other standard operating concepts.
- Two large colour displays (1x workman basket, 1x vehicle rear).
- Additional control terminal with current operating data of the working platform in the driver's cab.
- Lighting control possible via all displays.
- Two cameras at the articulation point of the work platform (1x towards the vehicle and 1x towards the basket) with display via operating displays.
- Start-to-work function with four starting positions: Basket is positioned close to the ground for entry.
- Memory function: Any position can be stored and retrieved (two memory locations).
- Coming home function - automatic return of the boom into transport position
- Additional radio remote control for convenient operation of the stabilisers and platform with all-round visibility from the ground.
- Start-Stop switch of truck engine from the basket

### PRODUCTIVITY, SAFETY, QUALITY

- Hydraulic power generator with 6.5 kVA enables extensive use of tools in the basket.
- Preparation for various remote access systems, e.g. for remote diagnostics.
- Collision protection on the basket.
- Connections in the basket:
  - Electrical 24 V / 230 V / 400 V
  - Hydraulic ETHMA class D
- LED work lighting in and on the basket, on the booms and for the work areas on the ground for optimum visibility.
- Machine operating data is displayed in the display, including
  - Oil level and temperature
  - Fuel level
  - Load torque limiter display
  - Current basket load and reserves
- Emergency controls from the ground via the radio remote control.
- Intercom system via radio for basket to ground communication.
- Lockable storage box at the rear. Further customisable storage boxes available on request.
- 4x robust stabiliser plates incl. transport bracket.
- High-quality standard paint finish of the boom in RAL 3020(red) and the hydraulic cylinder in RAL 9006 (white aluminium).
- Sending service information via QR code shown on the display.
- Easy maintenance access with lighting and intuitive diagnostic function.

### OPTIONS & ACCESSORIES\*\*

- Custom paintwork, one colour, according to RAL scheme\*\*\*
- Custom paintwork, two colours, according to RAL scheme\*\*\*
- Additional Flashlights on the boom system
- 1 LED headlight (platform)
- Additional sensory collision protection under the basket

## OFFICIAL DISTRIBUTOR

Alfa Access Services Ltd  
Unit 1 & 2, The Camp  
Wood Lane, Ramsey  
Huntingdon, PE26 2XB  
United Kingdom
